

Marjoram - Sweet

Grows to 35-45cm. Small knots of white or pink flowers are produced in Summer.

Choose a full sun position with light fertile soil.

Boost nutrient level with dynamic lifter.

Allow soil to dry between watering. Avoid overhead watering, and do not overwater.

Feeding is not required if the soil is already enriched with compost and aged manure.

A Mediterranean herb, marjoram can be used fresh or dried when making pasta sauce, or salad dressings.
