

Basil Lettuce Leaf

Similar flavour to Sweet Basil but a little milder. The most productive of the basil, this large Italian variety is excellent for pesto and basil in oil. The large curly leaves are 100mm wide by 150mm long and are borne on a compact plant. Leaves hold their flavour well under hot growing conditions and the plant is slower to flower, ensuring a longer harvest period.

Keep well watered and remove flower buds as soon as they appear for continued leaf growth.

Good for tossing in salads or wrapping up fish or chicken.
